CARLOS HERNANDEZ

SKILLS

React.js | NodeJS | Saas | JavaScript | Responsive Design | Git Flow | TypeScript | HTML5 | CSS3 | Font End Development | JSON | NEXT.js | GitHub | MongoDB | React Native

EXPERIENCE

Freelance Developer - Remote   Nov 2021 - Present

- Develop web and mobile web applications with a mobile first mindset to ensure user friendly UI.
- Apply critical thinking to create efficient, intuitive, and highly supportable UIs based on the specification of stakeholder.
- Perform unit testing using the open source Jest and Enzyme to test React components for automated unit testing.
- Create mobile application with React Native from scratch to a shipped application in the Playstore and App
- Efficiently documented all steps of the product life cycle to ensure scalability as the project continued to grow and improve based on feedback or user needs.

Frontend Engineer Vitau (Y Combinator S19) - Remote   Sep 2021 - Nov 2021

Help doctors and patients communicate with each other via web platform, where patients can schedule real world visits for simple check ups or last minute care without the hassle of long call times.
NEXT.js | TypeScript | Sass | Git Flow | Node.js

- Collaborated in a remote cross functional team of 3 Backend Developer, 2 UX Designer and 1 Frontend Developer to ship a responsive web application from scratch.
- Spearheaded the development of a responsive web application using Atomic Design resulting in a pixel perfect website creation.
- Researched and successfully integrated Google Calendar API to allow patients to schedule real world visits with their doctors.
- Constructed UI features according to the specifications of the UX-Designer and recommended and created innovative user friendly improvements.
- Used Jira for user story tracking processes and streamlining agile planning.

EDUCATION

Full Stack Web Development & Computer Science BloomTech   May 2019

9+ month accelerated program with immersive (full-time, 40+ hours/week) hands-on curriculum with a focus on computer science, software engineering and web development.

- Achieved endorsement, confirmation of mastery of technical and professional skills, through code challenges, document development and other interviews.
- Utilized agile software development and Git workflow on all projects.

Hobbies and Interests

I enjoy playing chess, board games, and am an enthusiastic team player. I play an online strategy game where I have been a leader of a group of over 200 people that has completed and won multiple season tournaments.
